PostgreSQL Demo Database - Easy Commands

Step 1: Connect to PostgreSQL

```
psql -U postgres -d your_db_name -h your_host -p 5432
```

Step 2: Create Tables

```
CREATE TABLE categories (
  category_id SERIAL PRIMARY KEY,
  category_name VARCHAR(255),
  description VARCHAR(255)
);

CREATE TABLE customers (
  customer_id SERIAL PRIMARY KEY,
  customer_name VARCHAR(255),
  contact_name VARCHAR(255),
  address VARCHAR(255),
  city VARCHAR(255),
  postal_code VARCHAR(255),
  country VARCHAR(255)
);

CREATE TABLE products (
```

```
  product_id SERIAL PRIMARY KEY,
  product_name VARCHAR(255),
  category_id INT,
  unit VARCHAR(255),
  price DECIMAL(10,2)
);

CREATE TABLE orders (
  order_id SERIAL PRIMARY KEY,
  customer_id INT,
  order_date DATE
);

CREATE TABLE order_details (
  order_detail_id SERIAL PRIMARY KEY,
  order_id INT,
  product_id INT,
  quantity INT
);

CREATE TABLE testproducts (
  testproduct_id SERIAL PRIMARY KEY,
  product_name VARCHAR(255),
  category_id INT
);
```

Step 3: Sample Insert

```
INSERT INTO categories (category_name, description)
VALUES ('Beverages', 'Drinks');

INSERT INTO customers (customer_name, city, country)
VALUES ('John Doe', 'Chennai', 'India');

INSERT INTO products (product_name, category_id, price)
VALUES ('Tea', 1, 10.5);
```

Step 4: Basic Queries

```
SELECT * FROM categories;
SELECT * FROM customers;
SELECT * FROM products;
```

JOIN Example:

```
SELECT o.order_id, c.customer_name
FROM orders o
JOIN customers c ON o.customer_id = c.customer_id;
```
